Metastatic Breast Cancer Clinical Trials Symposium
MBC Connect 2.0
Saturday, November 2, 2019  |  Beckman Center  |  Irvine, CA

Share your experiences from today on social media @komenoc
If you or a loved one needs information or resources about clinical trials, call our Clinical Trial Information Helpline at 1-877 GO KOMEN (1-877- 465- 6636) or email clinicaltrialinfo@komen.org.

The helpline offers breast cancer clinical trial education and support, such as:

• Knowing when to consider a trial
• How to find a trial
• How to decide which trial is best
• What to expect during a trial
• Information about clinical trial resources
What is MBC Connect?

MBC Connect is a free mobile and web based tool for the metastatic breast cancer (MBC) community. Available in English and Spanish, the app not only helps you store important disease and health information, it also provides researchers and clinicians with a powerful real-time database that can drive research, discoveries and advances hoped for by the estimated 155,000 women and men in the U.S. who are living with MBC.
COMPLETE SURVEYS
Share your story.

RECEIVE INSIGHTS
View news, events & data.

HELP DRIVE RESEARCH
Share your treatments.
How MBC Connect Works

Be Part of a Movement

You have the power—in the palm of your hand—to contribute valuable information to advance MBC research.
Designed By Patients, For Patients

Surveys are brief and easy-to-use, and you can complete them at your own pace.
Share Your MBC Experience

Be the author of your MBC story and share it easily with your family or health care team – printed out or on your device.
Receive Custom-Tailored Insights

Based on information you enter, we'll send you personalized insights and alerts with MBC news, events, and clinical trial opportunities.
How is MBC Connect different from traditional registries?

MBC Connect empowers patients and caregivers by providing the opportunity to be active and engaged partners in important research. At the same time, researchers, and health care professionals benefit in two ways: (1) they can access a real-time, deidentified database that can drive research and discoveries; and (2) they can use it to identify patterns, trends, and strategies that may effectively treat different types of patients. In addition, researchers can leverage the database to submit additional approved survey questions.
MBC Connect is an initiative led by the MBC Alliance. The MBC Alliance was formed in 2013 and is the largest coalition in the U.S. focused on metastatic breast cancer. The membership comprises nonprofit organizations, pharmaceutical and biotech companies, and individual patient advocates or patients living with MBC. Click HERE to view a listing of the current members. The goals of the MBC Alliance are to (i) advance MBC research, (ii) increase access to MBC information and support services, and (iii) increase awareness of how MBC is different from early stage breast cancer.
“MBC Connect can help patients feel connected to fellow MBC patients, and their physicians and care teams, like never before.”

Timothy J. Pluard, MD
Medical Director of Saint Luke’s Hospital Koontz Center for Advanced Breast Cancer

“We're working hard to unlock the mysteries of a marginalized patient population that's only received a fraction of breast cancer research funding.”

Marc Hurlbert, PhD
Past Chair, Metastatic Breast Cancer Alliance

“As a person living with MBC each day, I believe that MBC Connect will help accelerate research for the benefit of a community that demands progress.”

Shirley Mertz
President, Metastatic Breast Cancer Network & Chair, Metastatic Breast Cancer Alliance
